PRICE LIST

1910-1911

CALIFORNIA
NURSERY
COMPANY

NILES, CALIFORNIA

TO CORRESPONDENTS

1st. This catalog cancels all previous prices, either in special lists, offers or catalogs. This rule will be strictly observed.

ORDERS.

2d. Order early so that you may get the varieties and grades you prefer. All orders should be legibly written on a separate sheet and not mixed up in the body of the letter, thereby saving us a great deal of trouble and tending to prevent mistakes. Never write on both sides of paper.

QUANTITIES AND PRICES.

3d. The articles in the following list will be furnished at the annexed prices ONLY when the quantity specified shall be taken. Five hundred, however, will be furnished at the thousand rate, fifty at the hundred rate, and five at the ten rate. The absence of a thousand, hundred or ten rate means in each case that the next best rate is the lowest we can make. In no case does this mean so many trees of assorted classes, but refers only to ONE CLASS of assorted varieties; for instance, 5 apples, or 5 pears, or 5 plums, of different varieties, but not 2 apples, 2 pears and 1 plum.

SUBSTITUTIONS.

4th. Where particular varieties are ordered, and particular ages and sizes of trees, kind of stock, etc., it should be stated whether, and to what extent, substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible. If the selection of varieties is left entirely to us, we shall endeavor to send only such sorts as are acknowledged to give general satisfaction.

PACKING.

5th. All trees and plants are carefully labeled, and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material only, will be made; but no charge is made for the delivery of packages to the railroad or express offices at Niles.

EXPRESS OR FREIGHT.

6th. Always state which way you want your order shipped and give explicit directions for marking packages.

When it is left for us to choose the mode of conveyance, we will exercise our best judgment; but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

GUARANTEE, ETC.

7th. We warrant all trees and plants to be good, thrifty and true to label, but having no control over them after delivery to the transportation companies, or over the planting and care after they are received by the buyer, we will not be responsible in any other direction than as stated, and accordingly, if any tree or plant should prove untrue to kind, we will either replace the same or refund the amount paid; but in no case will we be liable for any sum greater than that originally paid, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery of the same shall have been accepted by the buyer.

REPLACING.

8th. For the reason that we have no control over the planting, pruning and care of the trees after they leave our hands, we will not under any circumstances replace any trees that may die.

ERRORS AND SHORTAGES.

9th. Customers are requested to notify us immediately should any error or shortage occur in filling their orders so we may rectify it at once. Any such claim must be made within one week after receipt of shipment; otherwise it will be assumed that the goods are satisfactory and in accordance with invoice.

C. O. D. AND STRANGERS.

10th. Orders from unknown correspondents must be accompanied by the cash or satisfactory reference. Orders to be sent C. O. D. must be accompanied by at least one-half the amount in cash; otherwise they will not receive attention.

REMITTANCES.

11th. Remittances may be made by check or draft on San Francisco banks, Express or Post Office money order on Niles, by registered letter or cash by express prepaid.

WRITE PLAINLY.

12th. Always be sure to write your name, Post Office address, and Express or Freight office plainly so no mistake can be made by us.

All communications should be addressed to

SIX HUNDRED ACRES

PRICE LIST

SEASON 1910-1911

ALL PRICES QUOTED ARE NET—NO DISCOUNTS

INDEX AT END OF CATALOG

Fruit and Ornamental Trees

Evergreens, Palms, Shrubs, Roses, Etc.

We present herewith our price list for the coming season (twenty-sixth edition), and wish to call attention to a few facts. Our nurseries are the most complete on the Pacific Coast. Our shipping facilities are unexcelled both for domestic and foreign business. For many years we have led in introducing and testing, under California conditions, the most promising foreign and other new varieties of fruit. We have in actual bearing here at Niles our own trees of every variety we offer for sale. Probably no other nursery can cut their buds from their own fruiting trees. Our buds and cions are taken from these bearing trees, cut and distributed by one man, making the mixture of varieties well nigh an impossibility. The unequaled reputation which our trees have, not only on the Pacific Coast, but in almost every country in the world, is an indication of the great care we exercise in every detail of our chosen line of work.

All interested parties, whether intending to purchase or not, are invited to visit the nursery, and if we are notified of time of arrival at Niles, and number of persons coming, will have conveyance at station to meet them.

CALIFORNIA NURSERY COMPANY.

Niles, November 1, 1910.

OFFICERS:

Egbert B. Stone, President.

John H. Henn, Secretary.

A. C. Hammond, Vice-President.

Central National Bank, Oakland, Treasurer.

W. V. Eberly, Manager.

DIRECTORS:

Stewart H. Hawley, Oakland.

A. C. Hammond, San Francisco.

Egbert B. Stone, Elmhurst.

John H. Henn, San Francisco.

W. H. Landers, San Francisco.

R. M. Sims, San Francisco.

W. V. Eberly, Niles.

SPECIAL NOTICE (SHIPPING)

We are now able to ship from Niles by both the Western Pacific and the Southern Pacific, and request customers who can get their goods by either road to always state which route they prefer.

HINTS ON TRANSPLANTING

The many excellent treatises on Fruit Culture which have appeared within the past few years—one or more of which should be in the hands of every person intending to plant—render it almost unnecessary to give any directions in that line; yet we are so frequently asked for advice in this way, that we offer a few general remarks.

The situation of the orchard having been decided on, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. In planting, the top soil should be broken down into the hole, and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may in light soils stand from two to three inches deeper than it stood in the nursery; but in heavy clay or wet ground it is advisable to have it stand at the same height as it was before transplanting.

On account of our long, hot, dry summers, it is well to shade the sunny side of the tree, to keep borers out, with a board or shake stuck in the ground, or a piece of hurlap wound loose around the tree up to the limbs, top tied loose with a string. Whitewash made out of whiting or lime will also protect the tree against sunscald.

See back of Catalog for list of useful horticultural books we have on hand for sale.

DISTANCE FOR PLANTING

Standard Apples	25 to 30 feet apart each way
Standard Pears	20 to 24 " " " "
Strong-growing Cherries	20 to 24 " " " "
Duke and Morello Cherries	18 to 20 " " " "
Standard Plums and Prunes	20 to 24 " " " "
Peaches and Nectarines	20 to 24 " " " "
Apricots	24 to 30 " " " "
Walnuts	40 to 50 " " " "
Grapes	7 to 10 " " " "
Currants and Gooseberries	4 by 6 feet
Raspberries and Blackberries	3 to 4 by 5 to 7 "
Strawberries for field culture	1 to 1½ by 4 to 5 "
Strawberries for garden culture	1 to 2 feet apart

Number of Trees or Plants on an Acre at Given Distance Apart.

		Square Method	Equilateral Triangle Method

"	22 " " " " " "	90	104
"	24 " " " " " "	75	86
"	25 " " " " " "	69	79
"	30 " " " " " "	48	55
"	35 " " " " " "	35	40
"	40 " " " " " "	27	31
"	50 " " " " " "	18	20

Rule—Square Method.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre (43,560), will give the number of plants or trees to the acre.

Rule—Equilateral Triangle Method.—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

FRUIT DEPARTMENT

All our Fruit Trees are grown on whole Seedling roots. The advantages of these in promoting the health and thriftiness of trees over others grafted on pieces or sections of roots, or budded on stocks grown from cuttings, is acknowledged by the best authorities, and is easily apparent to the most casual observer. All two-year-old trees are branched low and are stoeky, having been cut down or headed back when yearlings, two feet above ground, except where noted.

All of our Apple Trees and Grape Vines are fumigated with hydrocyanic gas when dug, so are the buds, cions, and cuttings, prior to budding, grafting, or planting out in Nursery. This positively kills any insects that may be thereon, without any injury to trees or vines. We have a Fumigating House, with three compartments, so that we can disinfect, at any time, either 50 trees or 10,000.

Apple—New.		Each	Per 10	Per 100

WALNUTS

The planting of the improved varieties of the "English" Walnut is steadily increasing, not only in Southern California, but along the whole Pacific Coast, even into British Columbia. These trees are as profitable as any other fruit, and are long-lived if planted in suitable soil, which should be deep, well drained, and capable of retaining the moisture during the summer. They should be planted not less than 40 feet apart each way.

Mayette	Zante			
	(U. S. D. A.)			

The following "French Varieties" are grafted on Black roots at various heights ranging from 10 to 30 inches above the ground. This manner of working gives the trees Black Walnut bodies, which, with their thick, rough bark, will not be so liable to sunburn, and are, therefore, particularly valuable for use in the hot parts of the State.

ORNAMENTAL DEPARTMENT

From here on all items are listed under same names and arranged precisely as in our No. 2 catalog (describing ornamental trees and plants). The latter is the most complete and accurate publication of its kind ever issued on this Coast. While its price is 25 cents, we will gladly send a complimentary copy on request to any interested customer. It is invaluable to any one planting ornamental stock.

All plants in this division have been once or more transplanted, which contributes greatly to the certainty of their growing. Balled trees and plants should **always** be set without removing the burlap from the roots.

In cases where items are quoted **only** "per 10" or "per 100," we will not accept orders for less than 5 and 50 respectively.

NOTICE.

Where we catalog and specify **SIZE OF BOXES**, it means that the trees or plants so listed have been established in boxes for at least six months. Such plants, as well as those in pots, can be shipped and planted at any time of the year. **BOXED** means that the plants so quoted are in the field and of such size that it is necessary to dig them into boxes.

CONIFEROUS EVERGREENS

This section includes only evergreen conifers. Other evergreen trees and shrubs, usually called "Broad-leaved Evergreens," are listed separately in the next division, commencing at page 17.

HEDGE PLANTS

The following list includes plants suitable for this purpose. Sizes and prices are shown on pages noted below.

Berberis darwini	18	Laurel (English and large-leaved)	23	Nandina domestica	25
Box (all varieties)	18	Laurustinus (all varieties)	24	Oleander (all varieties)	25
Cherry (Catalina)	19	Ligustrum ovalifolium (California Privet)	24	Pine—Monterey (for tall hedges)	14
Cypress (Monterey)	13	Melaleuca decussata and ericifolia	25	Pittosporum crassifolium , eugenioides	26
Escallonia berteriana leucantha and rubra	21	Myrtle (all varieties)	25	Quince (Japanese Scarlet.)	36
Euonymus japonicus and all its varieties	22			Veronica (all varieties)	26
Heath (Mediterranean)	22				

DECIDUOUS ORNAMENTAL TREES

Please note that all trees in this class over 12 to 14 ft. tall are graded and quoted according to their diameter measured at 4 ft. above the ground. As a rule, such trees have been headed back to 9 ft. and have good heads. With proper planting and after-care there should be little or no loss in using these large trees.

	Diam. in in.	Height in ft.	Each	Per 10	Per 100
Albizzia julibrissin	3 to 4		2 00

ROSES

This season we offer an unusually large list of the best American and European Novelties. We are continually testing new productions and offering those with decided merit.

Our soil and climate are ideal for growing rose plants. Those offered are two years old and have been grown entirely in the open ground. They have all bloomed the past season, and with any reasonable care can hardly fail to bloom again the first season after planting.

For more detailed descriptions of all except the "Latest Novelties" see the rose section of our Catalog No. 2, which will be sent on request to any customer.

EUROPE'S GREATEST ROSE NOVELTIES

\$1.50 each.

Lyon (H. T.). The greatest and most beautiful rose of the century. Coral red or salmon pink; chrome yellow at center and shrimp pink at the tips.

Veilchenblau. A new Rambler Rose sent out by the Germans, who call it "the fore-runner of a genuine cornflower-blue rose." It is hardy, very vigorous and blooms profusely.

LATEST NOVELTIES

\$1.00 each.

Dorothy Page Roberts (H. T.). A lovely shade of coppery pink, suffused with apricot yellow, especially at the base of petals, which are very large, massive and of great substance.

Elizabeth Barnes (H. T.). Satiny salmon rose with fawn center suffused with yellow. Outside of petals deep rosy red, shaded with copper and yellow. A charming rose, possessed of delightful fragrance.

George C. Waud (H. T.). Orange vermillion. A shade of color heretofore unknown among roses. Large, full and perfectly formed, with pointed center.

Grace Molyneux (H. T.). A fascinating rose of rare beauty and faultless form. The color is apricot, tinted flesh in center; but when fully developed the outer petals are creamy white on the inside with a pink sheen on the reverse.

Helen Good (T.). A rose that has all the good points of the Cochet. The buds are of exquisite form; color is a delicate yellow, suffused with pink, with deeper edge.

Hugh Dickson (H. P.). A splendid rose; brilliant crimson shaded scarlet, petals large and smooth, slightly cupped and of fine form.

John Cuff (H. T.). Deep carmine pink with a most attractive and distinct yellow zone at the base of each petal; standing by itself on account of its novel and striking color.

Lady Ursula (H. T.). A delightful shade of flesh pink. Flowers, produced on every shoot, are very large, full, and of perfect form, with high center, from which the petals of great substance gracefully reflex.

Miss Kate Moulton (H. T.). A rose of entrancing beauty. The flower is superb; large, full and perfectly formed. The color is beautiful silvery pink.

Molly Sharman Crawford (T.). Purest white. Flowers profusely and continuously. The blooms are delightfully scented, large, full, and perfectly formed, with high pointed center.

Mrs. Myles Kennedy (H. T.). Delicate silvery white shaded buff, deeper pink in center, with back edge of petals slightly deeper shade of pink. A most beautiful, distinct and charming addition.

My Maryland (H. T.). A grand pink variety that has come to the front with great strides. A splendid bloomer and superb rose.

Pink Cherokee. A pink flowering form of the Single Cherokee rose. Possesses all the merits of the original.

Rhea Reid (H. T.). Rich, dark, velvety red; full, double flowers of good form, and as fragrant as La France. A rose of great excellence.

White Killarney (H. T.). A pure white sport from Killarney, identical with its parent except in color.

NEW AND SCARCE VARIETIES

50c each.

Avoca (H. T.). Crimson scarlet.

Betty (H. T.). Coppery rose.

Chas. J. Graham (H. T.). Dazzling orange crimson.

***Climbing Belle Siebrecht (H. T.).** Bright rosy pink.

Dean Hole (T.). Intense salmon pink.

Etoile de France (H. T.). Rich red, shaded velvety crimson.

Franz Deegen (H. T.). Creamy yellow.

Frau Karl Druschki (H. P.). Snowy white.

***Gainesborough (H. T.).** Pale flesh.

Hon. Ina Bingham (H. T.). Purest pink.

La Detroit (H. T.). Shell pink.

Lady Battersea (H. T.). Cherry crimson.

Lady Clanmorris (H. T.). Deep peach.

Lady Faire (H. T.). Light carmine rose, shaded salmon.

Lady Moyra Beauclerc (H. T.). Flesh pink.

Mad. Vermoral (T.). Coppery yellow.

Mildred Grant (H. T.). Flesh pink.

Mrs. Theodore Roosevelt (H. T.). Creamy white, flushed rose.

Prince of Bulgaria (H. T.). Rosy flesh.

Rosalind Orr English (H. T.). Bright scarlet pink.

Yellow Maman Cochet (T.). Light yellow, edged rose.

*Varieties starred are climbers.
